- Customizable to your needs

CHOOSE THE MODULES THAT BEST SUIT YOUR NEEDS

ACQUISITION MODULE

Manage asset acquisition with unique codes, parent-child asset relationships, and detailed tracking for departments, vendors, and locations, including asset-specific information like serial numbers and bill details

PO MODULE

Handle purchase requests, customizable purchase orders, and tracking of accounts payables and advances, while maintaining vendor details, item catalog, GST information, and processing full/partial goods receipt

PV MODULE

Schedule and track physical verification with a mobile app using GPS, generate QR code labels, and allow updating status and pictures during verification, providing dashboards and reporting for tooling and non-tooling assets

MAINTENANCE MODULE

Define maintenance schedules (daily to yearly), create checklists, assign tools and consumables, and use a mobile app to track task progress, with dashboard reporting on asset-wise maintenance activities

TICKETING MODULE

Categorize IT asset issues up to three levels, automate ticket assignment, track progress, and maintain service level agreements (SLAs) for ticket assignment and resolution, allowing delegation and priority-based tracking

DEPRECIATION MODULE

Calculate asset depreciation using various methods (SLM, WDV, life-based), track modified values, and generate statements, with additional books, Companies and Income Tax, including salvage value management

SALE MODULE

Manage the workflow for asset sale requests, reviews, approvals, and uploads documents, allowing asset splitting and tracking profit/loss, with GST reconciliation and generation of sale memos

ASSET TRANSFER MODULE

Define workflows for asset transfers, manage requests, reviews, approvals, and document uploads, maintaining recipient status across departments, locations, cost centers, or asset users, with reporting on transfer status

Top-class fixed asset management with our custom module toppings!

- Maximize value with a dynamic solution through specialized modules
- Benefit from flexible and customizable solutions tailored to your unique asset management needs
- Seamlessly integrate essential and specialized features with your ERP system
